Yash Tyagi

AI PRODUCT & GROWTH ASSOCIATE

0→1 Product · AI Execution · Growth & GTM

+91 7300916622 | yashclient.flow@gmail.com | Personal Website | LinkedIn | X | YouTube

Profile

0→1 AI product and growth operator—runs discovery, AI-assisted execution, GTM, and market validation as a single loop, independently. Shipped multiple AI/SaaS products with real user and revenue validation; fits early-stage teams where one person covers product, growth, and iteration end-to-end.

Skills & Core Competencies

Product & Strategy: Problem Discovery · Customer Research · ICP Definition · Product Validation · Build–Measure–Learn
AI & Execution: AI Product Strategy · LLM/Agent Workflows · AI-Assisted Prototyping · Automation
Technical Product Fluency: Next.js · React · TypeScript · Python · Tailwind CSS · Supabase · n8n · Figma/UI/UX
Growth & Distribution: GTM Strategy · Lead Generation · Positioning · Cold Outreach · Founder-led Sales · PMF Testing
Technical Fluency: Understand frontend/backend responsibilities, APIs, authentication, server-side systems, LLM integration, agent workflows, automation, and scalability trade-offs; use AI coding tools to prototype and ship efficiently and communicate technical requirements with collaborators.

Experience

INDEPENDENT AI PRODUCT & GROWTH OPERATOR *June 2025 – Present*

- Run the complete 0→1 execution loop: identifying bottlenecks, researching users, prototyping solutions, launching, driving sales, measuring outcomes, and deciding to iterate or kill.
- Base product decisions on market evidence—user behavior, retention, payment signals, and acquisition constraints—to determine the highest-leverage next action.

Selected Product Work

ITER8OS | *Founder Decision OS* *Aug 2026 – Present*
- **Problem → Solution:** Founders struggle to identify primary growth blockers; built an AI decision engine that pinpoints core issues and generates evidence-driven experiments.
- **Result → Learning:** Live with early users; using feedback to evolve one-off recommendations into a repeatable operational framework.

VECTOR AI | *Career Trajectory Product* *Aug 2026*
- **Problem → Solution:** Resume tools fail to solve long-term career execution; evolved ATS insights into a continuous trajectory intelligence platform.
- **Result → Learning:** Shifted from single-use document generation toward real-time resume-job alignment and actionable skill gaps.

LBES PRODUCTIZED AI SERVICE | *B2B Service* *Jun–Jul 2026*
- **Problem → Solution:** Customers needed custom trading implementations; converted technical capability into a specialized paid execution service.
- **Result → Learning:** Closed 4+ paid sales by owning lead research, positioning, demos, sales, and technical delivery.

B2B AI AUTOMATION & SALES SYSTEMS | *Confidential Client Work* *Apr–May 2026*
- **Problem → Solution:** Businesses lacked automated lead qualification and customer-recovery workflows; researched and built customized AI chatbot and sales systems.
- **Result → Learning:** Generated leads through targeted outbound and web research, handling discovery, pitching, demos, and delivery end-to-end.

LBES | *AI Trading Workflow Product* *Jan–Feb 2026*
- **Problem → Solution:** Traders struggled with consistent execution; built a personalized workflow mapping user context to structured rules.
- **Result → Learning:** Validated with 17 users, 147 trades, and $29 revenue before pausing due to operational and regulatory constraints.

KILLARITY ENGINE | *AI Founder Decision Workflow* *Oct–Dec 2025*
- **Problem → Solution:** Early-stage founders lack validation structure; developed an AI agent workflow for market research and competitive analysis.
- **Result → Learning:** Acquired 250+ users and a $29 paid sale via X/LinkedIn, using demand signals to refine the validation engine.

RESUMEAI | *AI Career Product* *Sep 2025*
- **Problem → Solution:** Freshers face ATS rejection; rapidly shipped an AI tool to bridge resume-job description alignment.
- **Result → Learning:** Generated 123 users and Rs. 1,960 revenue, revealing a larger opportunity in continuous career execution.

KIRANA X | *Local Commerce Product* *Jun–Jul 2025*
- **Problem → Solution:** Kirana stores managed udhaar and stock manually; built a multilingual mobile tracking application.
- **Result → Learning:** Acquired 100+ users (12+ retaining for 1.5 months) via WhatsApp demos and cold calls.

Commercial Experience & Education

- **Freelance AI / Sales Automation:** Sold tailored chatbot solutions to D2C sellers; paid engagements: Rs. 2,000–5,000.
- **Additional Paid Validation:** Monetized early tools including a digital tool at Rs. 199 and a technical service at $49.
- **Education:** JMS Group, Hapur – BBA (Currently pursuing) | CBSE – Class XII (Completed)
